Employment & Work Profile:

Present Employer : ***Infosys,Bangalore***
Designation **:** Software Engineer
Period **:** September 2009 – Present

Job Profile:

Worked as an application developer for a banking software for the client Citi Private Bank which is one of the leading Investment banks.

Project Details:

Worked on a project called Projectone. This project mainly deals with the development and maintenance of the CITI bank's internal website.
The banker uses this software to keep track of all the transactions and investments made by the customer. This software is primarily used by the banker for effective wealth management of the customer.
Currently both Development and maintenance of the website is taking place by incorporating various enhancements to the website when requested by the clients.

Technology and Processes:

Major technologies used in this project are
- Weblogic 10.3 Application server
- Application development using Java/J2EE
- Oracle 10g database
- Front end design using JSP,Javascript
- Jasper tool to print reports.
- Struts framework

Roles and Responsibilities:

- To develop the application using J2EE, java ,JSP ,javascript technologies
- To understand the requirement and implement the same using SDLC.
- Documenting Use-cases and detailed design documents and getting them approved by the Technical leaders
- To Develop the application and to do the unit testing of each module so as to deliver the defect free code.
- To act as a Technical Support as and when defects or issues have been raised by the testing teams and deliver the fix for the defect at the earliest.
- Defect tracking, prevention and Code reviews for maintaining quality of deliverables
- Release management activities - Creating & managing branches , managing code merges and triggering builds

- Have taken up additional responsibility of Configuration controller(CC) of our project which mainly is concerned with taking regular build of the code and deploying the same on weblogic servers and also maintaining and updating the code on a repository called VSS.
- Have extensive knowledge on a reporting tool called JASPER which is used to print the data on the web in different formats like CSV,PDF etc.
